

Prakhar Srivastava

Senior Data Engineer

📍 Oulu, Finland | prakharsrivastava10@gmail.com | +358 44 9630842 | linkedin.com/in/prakhar-

PROFESSIONAL SUMMARY

Senior Data Engineer with 8+ years of experience designing and operating large-scale data platforms across healthcare, retail, and enterprise analytics. Specialized in real-time streaming systems, lakehouse architectures, and cloud-native data platforms on AWS, Azure, and GCP. Proven track record of delivering production-grade systems supporting tens of millions of users while balancing scalability, cost, and reliability. Strong collaborator between engineering, product, and business stakeholders.

CORE COMPETENCIES

- Cloud Architecture & Design
- Solution Design & Delivery
- Enterprise Data Platforms
- Migration & Modernization
- Real-Time Streaming Systems
- Lakehouse & Data Warehouse
- Cost Optimization
- Security & Governance
- Technical Leadership
- Stakeholder Management
- Cross-Functional Collaboration
- Architecture Reviews

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (AWS) - S3, RDS, DynamoDB, Lambda, EC2, Glue, Redshift | Microsoft Azure – Synapse Analytics, Azure Data Factory, Databricks, Azure SQL, IAM | Google Cloud Platform (GCP) – BigQuery, DataProc, Pub/Sub, Vertex AI

Data & Analytics: Databricks (Lakehouse), Snowflake (Snowpipe, Performance Tuning), Medallion Architecture, Data Vault 2.0, Dimensional Modeling, Data Lakes

Streaming & Integration: Apache Kafka (Confluent), MongoDB, Spark Streaming, CDC Pipelines, ETL/ELT, API Integration

DevOps & Infrastructure: Docker, Kubernetes, CI/CD (Azure DevOps, GitHub Actions), Infrastructure as Code, Terraform

Languages & Tools: Python, PySpark, SQL, Grafana, Prometheus, Power BI

PROFESSIONAL EXPERIENCE

Senior Data Engineer

CVS Health (Caremark) - Chicago, USA | 2023 - 2025

Led architecture and delivery of enterprise-scale cloud data platforms supporting healthcare analytics and patient-centric insights.

- Designed and owned an end-to-end real-time data platform (Kafka, Spark Streaming, Snowflake, Databricks) ingesting and processing healthcare events at scale, supporting analytics and ML workloads across 50M+ patient records with strict HIPAA compliance.
- Designed real-time streaming architecture with Kafka and Spark Streaming, reducing data latency from hours to near-real-time for critical healthcare dashboards.
- Led containerization strategy using Docker and Kubernetes, standardizing deployment patterns and reducing environment inconsistencies by 60%.
- Representative Systems: Real-time healthcare analytics platform (Kafka + Spark + Snowflake), enterprise forecasting pipelines (Databricks Lakehouse).
- Implemented observability framework with Grafana and Prometheus, reducing incident response time by 40% and improving platform reliability.
- Drove architecture reviews and governance standards, ensuring scalability and cost optimization across cloud resources.
- Led design reviews and established ingestion, schema-evolution, and observability standards for a distributed team of 6 engineers, improving delivery consistency and reducing production issues.

Cloud Data Architect

Tiger Analytics (Client: PepsiCo) - Remote | 2022 - 2023

Designed and delivered cloud-native data architectures for enterprise analytics and forecasting systems.

- Architected Databricks Lakehouse solution with Medallion Architecture (Bronze/Silver/Gold), enabling self-service analytics for 200+ business users.
- Led cloud migration from on-premises Azure infrastructure to Azure Synapse + Databricks, improving query performance by 30% and reducing TCO by 25%.
- Delivered multi-cloud reference architecture using AWS (S3, Lambda, DynamoDB, RDS), enabling cross-cloud data federation.
- Defined data contracts, ingestion standards, and platform governance frameworks in collaboration with enterprise architecture team.

Data Engineering Consultant / Solution Architect

Capgemini & Accenture - India & Düsseldorf, Germany | 2016 - 2021

Delivered enterprise data solutions and architecture consulting for Fortune 500 clients across retail, finance, and manufacturing sectors.

- Designed enterprise data models and ETL/ELT pipelines using Data Vault 2.0 methodology, enabling scalable and auditable data platforms.
- Architected Power BI analytics solutions, reducing manual reporting effort by 15+ hours per week and enabling real-time business insights.
- Led onsite engagements in Germany, collaborating with client architects to align technical solutions with business requirements.
- Recognized with Rising Star and Excellent Contributor awards for delivery excellence and client satisfaction.

EDUCATION

Master of Science in Information Systems - University of Cincinnati, USA (2022)

Bachelor of Technology in Electrical & Electronics Engineering - Sikkim Manipal Institute of Technology, India (2016)

CERTIFICATIONS & ACHIEVEMENTS

- Azure Databricks Data Engineer Associate
- Top Winner of 6/7 Innovation Challenges across retail, finance, and public-sector domains. Runner's up in one.
- Recognized for customer-first architecture delivery and cross-functional leadership.
- Active mentor for engineers, contributing to team growth and knowledge sharing.

ADVISORY EXPERIENCE

Educational Technology Advisor | 2018 - Present

Consult with K-8 educational institutions on technology strategy, data systems design, and digital transformation initiatives. Undertake weekly communications and computer programming classes for under-privileged children in India.
